

upgrade free to modern IP telephony

If your total phone bill is currently more than £200 per month, then qualify to upgrade all your phones for free.

business phone scrappage scheme

If your monthly telephone bill is more than £200 per month then you are eligible to get as much as £5000 of free equipment without paying a thing. We promise that we will never charge you more than you already pay with your current provider.

We provide two options so you can pick the best way to upgrade your business' telephony for free:

cloud telephony

Get all new phones and an updated system without any of the headache of having to set anything up. It's as simple as plugging in your new, free phones and we do the rest. For absolutely free, we will upgrade your entire telephony system – plus, we promise that your bill will never exceed what it currently is!

Your updated system can not only cut the cost of your bills, but also can simplify your business communications and offers new functionality:

- Voicemail to email
- IVR (interactive voice response)
- Missed calls list
- Scheduled call-routing
- Optional mobile app integration
- Call conferencing
- Highly redundant with worldwide number ranges

onsite IPPBX (private branch exchange)

If you want your own IP PBX box, we'll give it to you for free! Get brand new phones, your own IP PBX box (a combined value of £5000) and you only pay a minimal installation fee.

With an onsite IP PBX, you get almost all the benefits of our cloud offer but with a few unique advantages:

- Security and accessibility
- Additional redundancy by using SIM, PSTN and ISDN backup lines
- Ability to integrate to traditional systems
- Lower running costs

save with SIP

With SIP trunking IP telephony, you gain flexibility and functionality that you can't get with ISDN. For example, with SIP trunking, you can present your outbound calling with up to 4,000 cities around the world from any of your offices. It also provides:

- ISDN line rationalization options
- Lower call costs
- Free international calls between offices
- As much as 70% lower line rental costs for multi sites
- Ability to move without changing geographic numbers
- Saves you from paying costly call-forwarding costs if there's ever a need for temporary relocation due to disaster recovery or BCP.
