Go LIVE & Go Global!

VISIORAY®

Skyline webcams

Introduction to scenic webcams

Thousands of webcams daily offer stunning views of lakes, parks, seaside resorts, beaches, famous monuments, squares, palaces and buildings of any kind and the most spectacular natural wonders from around the world.

Statistics show that the **webcams** web pages are clearly the **most popular** and **most viewed** destinations among website visitors; this reflects the increasing attention to this innovative and valuable form of communication today successfully used for tourist and travel purposes. Most visitors use with great pleasure webcams as their trip completion tool.

However, all depends on the first impression, as a matter of fact, a poor webcam's performance, or any promotional message of poor quality, will not have great effect on users. Moreover, **static pictures** will be perceived in a different manner **compared to LIVE HD video streaming**, this could bring to a loss of potential visitors and to negative customer's review, due to poor quality of the product/service.

SkylineWebcams is a unique and unbeatable Web & Social Media Visual Marketing System!

The SkylineWebcams™ technology

If compared with the traditional scenic webcams, Skyline, the **innovative technology developed by VisioRay®**, achieves a level never seen before thanks to breathtaking images video transmitted in real time and the capacity to serve thousands of simultaneous connections.

Skyline uses its own **HD live webcams** that produce highly suggestive images, with the result that clearness and chromatic fidelity will be really extraordinary, moreover today it is possible to get a high performance just with a **traditional ADSL line**.

The LIVE images are transmitted through an **intelligent distribution network** able to serve each user from the geographically closest node and to guarantee the top quality definition everywhere in the world.
