Anthony's Key

Attn. to: Mr. Samir

Info & Offers details:

Most of our current cameras installed in Honduras are working on SD' (Standard Definition) and can be upgraded to an HD and Full HD - current upload speeds needed are 250 Kbps work in SD, 500 Kbps in HD and 1.3 Mbps in Full HD.

www.skylinewebcams.com is eventually one of the best and most effective marketing system available today on the global market.

Our website and our webcams (combined) are generating 8-10 million of visits per month and the traffic is increasing every day due to our growing popularity and to the possibility for an unlimited number of websites around the world to embed on their pages our cameras, today they are more than 22,000 carefully hand-picked qualified websites. Not all websites will have this widget, it is based on the visitor count and other measurements.

We have officially entered the Honduras Market in December of 2013 after 5 years of research and development and 2 years of BETA Phase (testing cameras, technology, software and global integrated system) and our goal is to "Going Global" within the next 2 years. We have selected Honduras/ Bay Islands as one of our main and most important projects because it's very small and plenty of wonderful locations, Honduras is the perfect mix of beautiful places, history, art, culture, traditions, business and much more. Once we will have covered the main areas of Honduras (Roatan, Tela, La Ceiba, Copan and other locations). We will have an (almost) complete project, we are going to launch some massive campaigns in Honduras, in Europe and around the World, by presenting and promoting the Honduras Project in order to represent and promote our system at the same time. That means some amazing promotional and advertising campaigns that will bring incredible visibility and popularity to all those that are part of our Honduras Project.

Our aim is to grow exponentially of course and to make aware Tourism, Travel and Transportation' companies, organizations and agencies around the world about our webcams so they can "show" their destinations LIVE to their customers.

Moreover, we have other interesting projects and applications to be developed in Honduras prior to be delivered all over the World.

We would be very glad if your location will take part of our Project and benefit of the amazing visibility and popularity that our system may provide it with.

Your place would benefit by showing the location, not by just pictures or videos which are good, but through live site. It is like being there without being there. People love activity and the more activity you have the better.

Ref.: webcam/s positioned on the roof or outside your facilities and upon request eventually also inside any other location of your choice in Honduras- Sponsor Option only for the latter if they are not hosted on your facilities -,

"STANDARD OPTION" > implies a payment of **€350.00/\$500.00 one time payment** per webcam and does include your **permanent "logo" (banner)**, positioned just besides the video transmission (on the right side, below the blue window "Embed Camera .."), such as **"Webcam hosted Anthony's Key" - with active link that points to your website, the widget for your website and the Facebook fan page APP (your camera LIVE on your FB fan page)**, this special agreement will be valid for as long as your keep the webcam facing a view (approved by our system);

"SPONSOR OPTION" > (highly recommended) implies a payment of **€350.00/\$500.00 per year** per webcam and does include your **permanent "logo"**, positioned inside the video transmission (on the lower corner opposite to our SkylineWebcams logo), such as **"Sponsored by Anthony's Key" - with active link that points to your website, the widget for your website and the Facebook fan page APP (your camera LIVE on your FB fan page)**. This special agreement will be valid for as long as you renew the annual fee.

"ADS FREE WIDGET" > this option applies in the case you want to embed one or more widgets into your website but without any ads appearing during the LIVE transmission, the monthly rate depends on the simultaneous connections (simultaneous hits) on that camera in your website along one month period of time.

*Costs summary table based on simultaneous connections only if not ad supported.

1. Simultaneous Connections supported - 2. First Year payment in advance - 3. From the Second Year monthly payment (monthly invoicing) - 4. From the Second Year annual payment (payment in advance with 20% discount).

1. 25	2. €348,00	3. €29,00	4. €278,40
1. 50	2. €468,00	3. €39,00	4. €374,40
1. 100	2. €708,00	3. €59,00	4. €566,40

In this case, if the widget refers to a new camera that you host the price of the camera is included. Upon your request we may apply the selected monthly rate to more than one widget by considering the number of simultaneous visitors for the interested widgets all together (the price of one camera is still included, any additional camera that you eventually host implies a one off payment of €350.00).

"DEDICATED TITLE" > this option applies in the case you want to add the name of your hotel on the title of the webcam such as i.e. those of Fortina Hotel, British Hotel, Gente di Mare Restaurant etc.in Malta. This option is very effective also from the SEO point of view since all our cameras are going (more or less within a few months from their activation) on the first page in Google for some important keywords. That means a huge "brand visibility and popularity" if **"Anthony's Key"** is included on the title of the camera. Moreover we are implementing a new technology as for which when our cameras appear in Google the player of the related LIVE video will be positioned besides the title and description' section in order to increase the "click attractiveness" of the visitors on that page for the related webcam. This option implies a payment of **\$500.00 (one time payment)** per webcam; this

special agreement will be valid for as long as you keep the webcam facing a nice view (approved by our system).

All mentioned prices for all options do not include Customs, Delivery and taxes (if applicable) and Installation Costs (when applicable).

Currently based on your order, including delivery from Italy to Roatan, Estimates

Shipping -\$140.00/ camera

Configuration - \$70.00

Customs/taxes/delivery \$40.00

Extra cable/ connectors/ - \$10 - \$50.00

Installation- to make sure it is straight and installed correctly to protect it from water in the connections. \$100-\$150 depending on travel as well.

The SkylineWebcams cams are supplied on extended free loan, the user will be free from any cost concerning repairs or replacement for defective hardware or obsolescent components.

The “client” hosting the camera should supply electricity and internet connection on its own charge.

We will apply a 10% discount if ordering 5 or more cameras- so in your example, if all the airports want a camera - then we would honor this if ordered within the same time.

***Invoices from the company will reflect Euros not dollars, I converted for simpler explanation of pricing. Payment must be received before shipping will occur.**

There are other wonderful services and applications that I would be happy to explain to you in case of interest. I remain at your disposal if you need any additional info or clarification and to evaluate your eventual requests about the placement of our webcam/s as for your choice.

PS. I just did stats for the cameras in Honduras on Saturday (6 currently running) and we had over 208,000 visitors in just 21 days from the 1st cameras installed back on the 8th of March. That is very impressive numbers don't you think?

I look forward to your kind reply, with my best regards.
